Skills

- Programming Languages: C, Python, JavaScript, Dart, Java
- Frameworks and Tools: Flutter, React.js, Node.js, Express.js, Laravel
- Web & Mobile Development: HTML, CSS, JavaScript, Tailwind CSS, Flutter(Android)
- Databases: Firebase, SQLite, MySQL, PostgreSQL
- Deployment & DevOps: Docker, Git

Projects

- **Skill Hub**
A platform connecting clients with service providers to enable seamless service discovery and smart management. Built with React (frontend), Python Flask (backend), and Firebase (database) to provide efficient matching and enhanced user experiences.
- **Simple X Clone**
A social media platform clone that allows users to post updates, like content, and comment on posts in a sleek, interactive interface. Developed using React, Inertia, and Laravel, focusing on responsive design and smooth user interactions.
- **Blog-Post Full Stack MERN**
A full-stack MERN application that enables users to create, edit, and manage blog posts, with data stored in MongoDB. Built with React.js, TailwindCSS, and Express.js, emphasizing usability, responsive design, and full CRUD functionality.
